CEO Europe Appoints Henry Dorbes To Assure Development Of CFO Europe

12/2/2004

Location: Other Europe, Global Round Up

CEO Europe, which offers companies a temporary and/or permanent executive recruitment service drawing from a pool of over 1100 certified profiles, has recently enhanced its service portfolio with CFO Europe, offering a recruitment solution entirely dedicated to CFO positions on an international level and within France. This solution enables a targeted offer in line with the new demands of companies and adapted to the highly strategic dimension of this function. CFO Europe structures its pool of profiles to warrant an even better service to its clients by offering a solution that is equally adapted to the demands and limitations of the different structures of SMEs up to large groups.

CEO Europe has named Henry Dorbes as the new expert Partner to assure its development. Before joining CEO Europe, Mr. Dorbes completed several part-time missions as financial director over a period of more than 18 months. This newly appointed Partner has a track record of nearly 15 years of experience as financial and administrative director within international groups and SMEs. From 1999 to 2003, he participated in the very strong growth of the Gaudriot Group, specialised in environmental services and consulting (1000 staff, 47 plants throughout France). During these four years, he also piloted the IPO of the group and played an important role in the completion of 15 mergers and acquisitions of the Group in France, Belgium and in Portugal. Furthermore, he was responsible for the strategy of the development of the group in Europe.

From 1990 to 1998, Henry Dorbes held the function of CFO within the French subsidiaries of the Swedish Group Besam AB and the American Premier Industrial Corp. He is also member of the DFCG (National association of financial directors and controllers) since 1995.

Patrick Mataix, founder of CEO Europe, confirms, "We assist an important cultural change in the financial world and hence of companies too. In this unstable environment, that has an impact on all players of the economy, from start-up to multinational, the quality, coherence and transparency of financial reporting warrants shareholders trust capital and therefore the future development capacity of the company."
